

SCHOOL OF LAW
MIT ADT UNIVERSITY, PUNE

Program Name: LL.M in Cyber Law

Program Outcomes

PO NO.	Descriptions	Program Outcomes
1	Expertise in Cyber Law	Graduates will develop a comprehensive understanding of the legal frameworks, regulations, and issues related to cyberspace, including cybersecurity, data protection, intellectual property, privacy, electronic commerce, and cybercrime.
2	Analytical Skills	Students will acquire strong analytical and critical thinking skills necessary to assess complex legal issues in the digital realm, such as jurisdictional challenges, international law implications, and emerging technologies' legal implications.
3	Legal Research Skills	Graduates will gain proficiency in conducting legal research specific to cyber law, including utilizing online databases, understanding case law, and interpreting statutes and regulations.
4	Policy Development	They will be equipped to participate in the development and evaluation of policies related to cybersecurity, data privacy, digital rights, and internet governance, whether in government, private sector, or international organizations.
5	Communication Skills	Graduates will be able to effectively communicate legal concepts and arguments related to cyber law to various stakeholders, including policymakers,

		legal professionals, technology experts, and the general public.
6	Ethical Considerations	They will understand the ethical dimensions of cyber law practice, including issues of access to information, digital rights, surveillance, and the balance between security and privacy.
7	Professional Development:	Students may have opportunities for internships, practical experiences, or networking events to enhance their professional skills and connections within the field of cyber law.
8	Advanced Legal Research Skills	Acquire and apply advanced legal research methodologies tailored to the complexities of cyber law, including proficient utilization of online databases, understanding of relevant case law, statutory interpretation, and analysis of regulatory frameworks
9	Critical Analysis and Synthesis	Demonstrate the ability to critically analyze and synthesize legal information related to cyber law, identifying key precedents, emerging trends, and gaps in legal frameworks to propose innovative solutions and policy recommendations.
10	Application of Legal Research in Practice	Apply legal research skills to real-world scenarios, such as drafting legal opinions, memoranda, policy briefs, and regulatory compliance assessments, addressing complex cyber law issues faced by governments, corporations, and individuals.

Semester I				
Sr. No	Course Code	Course Titles	CO No.	Course Outcomes
1	23LLM0101	Introduction To Legal Theory	01	Theoretical Proficiency: Attain a high level of understanding and application of legal Theories.
			02	Analytical Thinking: Develop advanced analytical thinking skills for critiquing legal Problems.
			03	Interdisciplinary Integration: Apply legal theory to issues from diverse disciplinary perspectives.
			04	Interdisciplinary Integration: Apply legal theory to issues from diverse disciplinary Perspectives.
2	23LLM0102	Constitutionalis m	01	Explain the origin and development of the Indian Constitution and constitutional democracy

			02	Develop analytical skills to critically assess legal frameworks contributing to or impeding social change.
			03	Understand the historical context of legal interventions in social transformation.
			04	Advocate for social justice and equity through an understanding of legal principles.
4	23LLM0104	Legal Research And Methodology	01	Attain a high level of competency in conducting legal research using various methodologies.
			02	Efficiently utilize legal databases, libraries, and online resources for in-depth legal research.
			03	Demonstrate a commitment to ethical research practices, including proper citation and avoidance of plagiarism.

			04	Plan and design legal research projects with clear and well-defined objectives.
Semester II				
Sr. No	Course Code	Course Titles	CO No.	Course Outcomes
1	23LLMC201	Cyber Laws: Issues And Related Legislation	01	Students should demonstrate a solid understanding of key concepts in cyber law, including jurisdictional issues, legal definitions of cybercrimes, and the application of traditional legal principles to cyberspace.
			02	Students should be familiar with important cyber laws and regulations at local, national, and international levels, including statutes, treaties, and case law governing various aspects of cyberspace.
			03	Students should be able to apply legal principles and precedents to real-world scenarios involving cyber-related disputes, compliance challenges, and regulatory enforcement actions.
			04	Students should develop critical thinking skills and the ability to identify legal issues, analyze complex facts, and propose creative and practical solutions to legal problems arising in cyberspace.
2	23LLMC20	Cyber Crimes	01	Demonstrate proficiency in

	2	and Cyber Investigation Techniques		conducting cyber investigations, including evidence collection, analysis, and reporting, using appropriate tools, techniques, and methodologies.
			02	Demonstrate understanding of the legal framework governing cybercrimes and cyber investigations, including relevant statutes, regulations, and case law, and apply legal principles in investigative procedures.
			03	Identify and analyze cyber threats and attack vectors effectively, including malware infections, network intrusions, data breaches, and insider threats, and develop strategies for detection and prevention.
			04	Demonstrate competence in using digital forensic tools and technologies for data acquisition, preservation, and analysis, and apply forensic principles to recover and examine digital evidence from various sources.
3	23LLMC20 3	Cyber Security: Trends and Developments	01	Demonstrate proficiency in cybersecurity concepts, terminology, and principles, including threat landscape analysis, risk management frameworks, and security technologies.

			02	Stay abreast of current cyber threats, attack techniques, and vulnerabilities affecting organizations and individuals, and anticipate future trends and developments in cybersecurity.
			03	Evaluate the effectiveness of security technologies and solutions for addressing specific cybersecurity requirements, and make informed decisions regarding technology investments and deployments.
			04	Be prepared to pursue careers in cybersecurity, risk management, incident response, or related fields, equipped with the knowledge, skills, and experience gained from the course.

Semester III				
Sr. No	Course Code	Course Titles	CO No.	Course Outcomes
1	23LLMC301	Digital Evidence and Forensics Investigations	01	Understand key principles and methodologies of digital forensics.
			02	Collect and preserve digital evidence following legal protocols.
			03	Analyze digital evidence using industry-standard tools and techniques.
			04	Present digital evidence in legal contexts, adhering to Indian legal

2	23LLMC302	Laws Relating to E-Commerce and Digital Transactions	01 02 03 04	standards. Understand key legal principles and frameworks governing e-commerce and digital transactions in India. Evaluate the implications of various legal provisions on e-commerce businesses and digital transactions. Identify and analyze legal challenges and solutions in the digital marketplace. Apply legal concepts to real-world scenarios involving e-commerce and digital transactions.
3	23LLMC303	Intellectual Property in Cyberspace	01 02 03 04 03 04	Understand the key principles and legal frameworks governing IP in cyberspace. Analyze the impact of digital technology on the protection and enforcement of IP rights. Evaluate the challenges and solutions related to IP in the online environment. Apply legal concepts to real-world scenarios involving IP issues in cyberspace. Demonstrate a commitment to ethical research practices, including proper citation and avoidance of plagiarism. Plan and design legal research projects with clear and well-defined objectives.
Semester IV				

Sr. No	Course Code	Course Titles	CO No.	Course Outcomes
1	23LLMC401	Cyberspace and Human Rights: National and International Perspectives	01	Understand key principles and legal frameworks governing human rights in cyberspace.
			02	Navigate the legal and policy landscape of digital human rights protection.
			03	Evaluate and apply legal provisions to protect and promote human rights online.
			04	Analyze and interpret case law and policy debates related to digital human rights.
2	23LLMC402	International Regulations: Internet Privacy and Jurisdictions	01	Understand key principles and legal frameworks governing internet privacy and jurisdiction.
			02	Navigate the legal and policy landscape of data protection and cross-border data flows.
			03	Evaluate and apply legal provisions to protect personal data in an international context.
			04	Analyze and interpret case law and policy debates related to internet privacy and jurisdiction.
3	23LLMC403	Dissertation	01	Conduct independent and original legal research in a specialized field of law.
			02	Demonstrate the ability to critically analyze and apply legal principles to a specific topic.
			03	Develop advanced skills in legal

				writing, research methodologies, and presentation.
			04	Conduct independent and original legal research in a specialized field of law.

Dr. Govind S. Rajpal
Dean, School of Law
