

**SCHOOL OF LAW**  
**MIT ADT UNIVERSITY, PUNE**

**Program Name: LL.M in Intellectual Property Law**

**Program Outcomes**

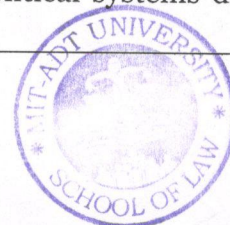

PO NO.	Descriptions	Program Outcomes
1	Expertise in Intellectual Property Law	Graduates develop a deep understanding of intellectual property law, including patents, trademarks, copyrights, trade secrets, and related areas such as licensing and enforcement.
2	Legal Analysis and Research Skills	Students acquire advanced skills in legal research, analysis, and interpretation, enabling them to navigate complex legal issues within the realm of intellectual property law.
3	Transaction and Contract Drafting	They gain proficiency in drafting, negotiating, and interpreting contracts and agreements related to intellectual property, such as licensing agreements, technology transfer agreements, and nondisclosure agreements.
4	Litigation and Enforcement	Students understand the procedures and strategies involved in intellectual property litigation and enforcement actions, including dispute resolution mechanisms such as arbitration and mediation.
5	International Intellectual Property Law	The program typically covers international aspects of intellectual property law, including treaties, agreements, and cross-border enforcement issues.
6	Advanced Legal Research Skills	Acquire and apply advanced legal research methodologies tailored to the complexities of intellectual property law, including thorough

		analysis of case law, statutes, regulations, and scholarly literature, to address contemporary issues and emerging trends in the field.
7	Critical Analysis and Synthesis	Demonstrate the ability to critically analyze and synthesize legal information related to intellectual property, identifying legal precedents, legislative developments, and judicial interpretations to propose innovative solutions and legal strategies.
8	Application of Legal Research in Practice	Apply legal research skills to practical scenarios, such as drafting legal opinions, memoranda, patent applications, trademark registrations, licensing agreements, and litigation documents, to address complex IP issues faced by individuals, businesses, and organizations.
9	Effective Communication of Legal Research Findings	Communicate legal research findings effectively through clear and concise written reports, presentations, and oral advocacy, tailored to diverse audiences including policymakers, legal practitioners, industry stakeholders, and the public, to contribute to informed decision-making and shape legal discourse in the field of intellectual property.
10	Ethical Considerations in Legal Research	Navigate ethical considerations inherent in intellectual property research, including integrity, confidentiality, conflicts of interest, and ethical implications of emerging technologies, ensuring adherence to professional ethics and standards of conduct.
