DGPA: Development Grade Point Average

Rubric Model of Assessment

Rubric means "a scoring guide used to evaluate the quality of students' with constructed responses.

A scoring rubric is an attempt to communicate expectations of quality around a task. In many cases, scoring rubrics are used to delineate consistent criteria for grading. Because the criteria are public, a scoring rubric allows teachers and students alike to evaluate criteria, which can be complex and subjective. A scoring rubric can also provide a basis for self-evaluation, reflection, and peer review. It is aimed at accurate and fair assessment, fostering understanding, and indicating a way to proceed with subsequent learning/teaching. This integration of performance and feedback is called ongoing/Continuous assessment.

A rubric can be used in individual assessment within the course, or a project or capstone project. However, it can be used when multiple evaluators are evaluating the assessment to get focus on the contributing attributes for the evaluation. Rubrics are ideally suited for project assessment since each component of the project has a corresponding section on the rubric that specifies criteria for quality of work.

Scheme of Distribution

#	Particulars	Percentage Distribution
1	Classroom and Lab Attendance	10%
2	Classroom Participation	10%
3	Developmental Rubric Scoring (Continuous Evaluation)	60%
4	Transformation Assessment Day	20%
	Total	100%
